Chemical Search International advises IHS Markit on the appointment of four senior hires in Americas / EMEA

About IHS Markit; IHS Markit (NYSE: INFO) is the leading source of information and insight in critical areas that shape today's business landscape, including energy and power; design and supply chain; defence, risk and security; environmental, health and safety (EHS) and sustainability; country and industry forecasting; and commodities, pricing and cost. Businesses and governments in more than 165 countries around the globe rely on the comprehensive content and expert independent analysis of IHS to make high-impact decisions and develop strategies with speed and confidence.

About the appointments; The roles of Director Methanol, Americas, Director Aromatics (BTX) Americas, Director Aromatics (BTX) EMEA and Associate Director Methanol EMEA are responsible for market analysis and coverage in support of all IHS Chemical Market Advisory Services.
Chemical Search's role; This was to simultaneously fill these very hard to source roles in a particularly challenging timeframe.

Dewey Johnson, Vice President Market Research of IHS Market commented:

"We challenged Chemical Search International to source candidates for four challenging senior positions during the late part of 2019. The fact the requirements were so demanding, the business needs were so urgent and the timeframe was so short meant we had to put real pressure on them to deliver. Chemical Search dropped everything and came through for us, comfortably delivering excellent candidates in the required timeframe and keeping us up to speed on developments throughout. Thanks for a job well done"
